Contents of Vol. 156

Part 1

EDITORIAL 1

J. E. MAZILLE. Mathematical morphology and convolutions 3

TAMÁS RÉTI and IMRE CZINEGE. Shape characterization of particles via generalized Fourier analysis 15

MICHEL JOURLIN, JEAN-CHARLES PINOLI and RACHID ZEBOUDJ. Contrast definition and contour detection in logarithmic images 33

J. SERRA. Boolean random functions 41

L. OGER, M. LICHTENBERG, A. GERVOIS and E. GUYON. Determination of the coordination number in disordered packings of equal spheres 65

M. C. MOSS, M. A. BROWNE, C. V. HOWARD and D. J. JOYNER. An interactive image analysis system for mean particle volume estimation using stereological principles 79

A. YU SASOV. An integrated PC-based image analysis system for microtomography and quantitative analysis of inner micro-object structure 91

J. C. OLIVO, E. KAHN, S. HALPERN, C. BRIANCON, P. FRAGU and R. DIPAOLA. Microcomputer system for ion microscopy digital imaging and processing 105

P. CORCUFF, R. ROGUET and M. KERMICI. A method for measuring the various constituents of the human hair follicle 115

JOSEPH BARBA, HENRICK JEANTY, PAUL FENSTER and JOAN GIL. The use of local entropy measures in edge detection for cytological image analysis 125

Book Review 135

Part 2

TAKAO INOUÉ and HIROTAMI KOIKE. High-resolution low-temperature scanning electron microscopy for observing intracellular structures of quick frozen biological specimens 137

R. NOBILING and C. P. BÜHRLE. A microscope fluorimeter using multiple-wavelength excitation for ultrasensitive single-cell emission spectroscopy. Microfluorimetry on the single-cell level: prospects and problems 149

B. Heppelmann, K. Meßlinger and R. F. Schmidt. Serial sectioning, electron microscopy, and three-dimensional reconstruction of fine nerve fibres and other extended objects 163

P. W. Le R. Murray, A. W. Robards and P. R. Waites. Countercurrent plunge cooling: a new approach to increase reproducibility in the quick freezing of biological tissue 173

M. K. Lamvik, P. Ingram, R. G. Menon, L. S. Beese, S. D. Davilla and A. LeFurgey. Correction for specimen movement after acquisition of element-specific electron microprobe images 183

Th. Peschke, K. Augsten, F. Sasama and A. Gabert. Determination of gold-labelled surface receptors on single cells by X-ray microanalysis 191

D. R. Liu and D. B. Williams. Accurate composition determination of Be–Ti alloys by electron energy loss spectroscopy 201

M. M. J. Treacy and S. B. Rice. Catalyst particle sizes from Rutherford scattered intensities 211

G. B. Schaffer, M. H. Loretto and R. E. Smallman. The relative intensities of electron diffraction maxima in mixed rare-earth oxides 235

P. Meller. Microspectroscopy on single domains of phase-separated monolayers 241

V. Kolařík and V. Svoboda. An X-ray projection microscope with field emission gun 247

Short Technical Notes

J. Rostgaard and K. Kvortrup. Ultrathin sectioning for electron microscopy: the distilled water in the knife trough may extract phosphatase reaction products from the sections 253

Sudip Dey, T. S. Basu Baul, B. Roy and D. Dey. A new rapid method of air drying for scanning electron microscopy using tetramethylsilane 259

Book Review 263

Part 3

Nobuyuki Nakagiri and Hiroshi Kaizuka. Scanning tunnelling microscopy measurements of carbon deposited on to graphite 267

Peter Ridgway Watt and John Warrack. A rotary multiple-specimen holder for scanning electron microscopy 273

Ferdinand Hofer. EELS quantification of the elements Ba to Tm by means of N_{45} edges 279

Zbigniew Czyzewski and David C. Joy. Fast Monte Carlo method for simulating electron scattering in solids 285

J. T. Fourie. Back-scatter electron images at 200 kV of subsurface structures in composite materials 293

S. Michelland, B. Schiborr, M. Coster, B. L. Mordike and J. L. Chermant. Size distribution of granular materials from unthresholded images 303

J. F. Unsworth and H. Gough. Characterization of coals by automated optical image analysis. 1. Vitrinite reflectance 313

J. F. UNSWORTH and H. GOUGH. Characterization of coals by automated optical image analysis. 2. Inertinite reflectance 327

P. A. MOSS, R. C. HOWARD and E. SHEFFIELD. Artefacts arising during preparation of hydrated paper pulp samples for low-temperature SEM 343

JAMES C. GARRISON, PAUL PETERSON and EDWIN M. UYEKI. Computer-based image analysis of cartilage differentiation in embryonic limb bud micromass cultures 353

DAVID C. COTTELL, LINDA GILMARTIN and JOHN G. BANNIGAN. Immunohistochemical staining of bromodeoxyuridine-labelled cells in the mouse embryo 363

J. P. RIGAUT and A. PERSOZ. The 'corpuscle' problem—re-evaluation using slab fragment volumes and application to the correction of DNA histograms from sections of spherical nuclei 371

Book Reviews 383

Erratum 386
